SEED AND NURSERY PRODUCTION

PROFESSIONAL BACHELOR'S DEGREE

UNIVERSITÀ
DEGLI STUDI DELLA
TUSCIA

The Course meets the needs of job market and provides specific expertise for planning and management of sustainable production of seeds and seedlings having high quality traits. The Course aims to provide students with theoretical and practical education in seed sector (cereal, oil, forage and vegetable crops), nursery production (vegetable, ornamental, fruit and forest plants), registration and protection of new cultivars, in order to facilitate a successful entrance into the job market.

The Course is recognized by many seed companies and plant nurseries operating throughout the national territory, in which students will have to do a 50-hours internship.
