MANAGEMENT, FINANCE AND BUSINESS

MASTER'S DEGREE

The Master's Degree in **Management, Finance and Control** aims to help students develop advanced knowledge in managerial sciences, law, economics and statistics.

The program is organised in **three** different curricula:

Management and Control: students will develop problem-solving skills, acquiring abilities, aptitudes and competencies required to operate as managers or as entrepreneurs.

Finance: it is designed to give students an in-depth knowledge of concepts related to the structuring, pricing and risk-management of financial instruments. Students will additionally receive practice of the main analytical and quantitative tools used in the industry.

Quantitative methods and economic analysis: provides complete and high-quality education in economics and statistics. Students graduating from this course typically pursue careers as economists and statisticians in the research department of public and private organizations.

This Master's program covers different international initiatives carried out by UNITUS.

In all the curricula students will acquire advanced digital skills (such as R and Python) for empirical analyses on business, financial, economic and statistical studies.
