

Calendario dei seminari per i Dottorandi di Ricerca in “Scienze delle Produzioni Vegetali e Animali” - AA 2023/2024  
Coordinatrice del Corso di Dottorato: Prof.ssa Roberta Bernini -

Docente	Titolo	Data	Ora
Dott.ssa Sara Francesconi	Point-of-care tools for plant pathogens detection	16.02.2024	15.00
Dott.ssa Giovanna Frugis	The Smart-Breed project: Innovative molecular technologies for the adaptation of vegetable species to climate change through precision breeding	23.02.2024	15.00
Dott. Luca Narduzzi	The role of metabolomics and exposomics in food safety, food quality, and human health: promises and pitfalls	01.03.2024	15.00
Dott. Gianluca Burchi	The design, construction, and care of urban green areas	08.03.2024	15.00
Dott.ssa Federica Carucci	Precision agriculture and site-specific N fertilization management for sustainability	15.03.2024	15.00
Prof. Andrea Vitali	Livestock systems under the climate change scenario	22.03.2024	15.00
Dott.ssa Katia Liburdi	Insight the olive fruit from enzymatic activities to chemical-physical properties of extra virgin olive oil	03.04.2024	15.00
Dott. Giampiero Grossi	LCA and ecolabelling: a guide to environmental certification in the agro-livestock sector	05.04.2024	15.00
Dott. Cristian Silvestri	Current rules on GMOs: why should genome-edited plants be regulated?	12.04.2024	15.00
Davide Dell'Unto	Digital transition of farms: an analysis of the economic convenience to adopt innovative technologies	19.04.2024	15.00
Dott.ssa Giovanna Frugis	Approaches of “systems biology” applied to functional genomics of plants	24.04.2024	15.00
Dott. Salvatore Esposito	Unlocking the secrets of agricultural crops using -omics approach to understand the genotype-phenotype connection in the era of climate change	30.04.2024	15.00
