Camilla Tamborrino

PhD student in Economics, Management and Quantitative Methods with a strong interest in business cooperation for sustainable growth, rational management of natural resources and improving quality in agri-food value chains.

I love working in contexts where the exchange of information is active and the success is shared.

EDUCATION AND TRAINING

Università della Tuscia, Viterbo— *PhD in Economics, Management and Quantitative Methods.*

NOV 2022 – ONGOING

My main area of research is policy evaluation in the agricultural sector, with a particular focus on evaluating producer organisations (POs) in the olive oil sector.
A first research project has been initiated to analyse whether the new configuration of POs under the Common Agricultural Policy (CAP) 2023-27 can attract olive growers and whether existing members see benefits in pursuing new collective actions. The Discrete Choice Experiment (DCE) is being used as a methodology. The study's theoretical framework was identified in the literature on hybrid organisations to establish a connection between new CAP objectives and the theoretical forces that motivate this organisational choice.
A second piece of research aims to identify and measure the impact of POs on the economic, environmental and social performance of the sector through counterfactual approaches. The FADN database will be used for this purpose, as it provides representative data on three levels: region, economic dimension and technical and economic classification.

Università Federico II, Napoli— *Second-level advanced Master's Degree in Agricultural Economics and Policy*

JAN 2023 – DEC 2023

Main subjects: econometrics applied to agri-food contexts, agricultural policies.

100 cum laude and academic mention | Thesis: Decisions under the 2023-2027 CAP: A DCE on Olive Growers from the Perspective of Hybrid Institutions

Università di Roma Tre, Roma— *Master's Degree in Environmental and Development Economics*

SEP 2019 – DEC 2021

Main subjects: environmental economics, development economics, corporate and innovation policy.

110 cum laude | Thesis: The Bioplastic in the Agricultural sector: an example of Circular and Sustainable Bioeconomics.

La Sapienza Università di Roma, Roma — *Bachelor's Degree in International Economic Relationship*

SEP 2016 - OCT 2019

Main subjects: political economics, public finance, development and sustainability indicators.

110 cum laude | Thesis: Economic Growth and Inequalities: Empirical Analysis of the Italian Case.

Hochschule für Wirtschaft und Recht, Berlin — *Erasmus+ programme*

SEP 2018 - MAR 2019

Main subjects: international economics, international finance, international law.

This experience allowed me to cope with a different university context and to develop new integration and collaboration skills.

WORK EXPERIENCE

MOTUS-E, Rome —*Environment, Technology and Market Analyst*

MAY 2022 - DEC 2022

I carry out tasks related to data analysis, coordination of members' contributions to working tables, preparation of legislative proposals or requests to the Authority.

Università di Roma Tre, Rome— *Microeconomics Tutor*

SEP 2021 – APR 2022

I was awarded a merit scholarship to deliver support and recovery lectures for the Microeconomics course.

CREA- Council for Agriculture Research and Economics, Rome — *Internship*

DEC 2020 – MAR 2021

My internship focused on bioeconomy research, investigating the use of bioplastics in the agricultural sector and their potential benefits in achieving sustainability goals. It helped me to gain an in-depth understanding of the challenges faced by the agri-food sector.
